# BWT Premium Drinking Water System

Hot, cold & BWT premium filtered water from one elegant tap - the perfect lifestyle choice

FRESH

DELICIOUS

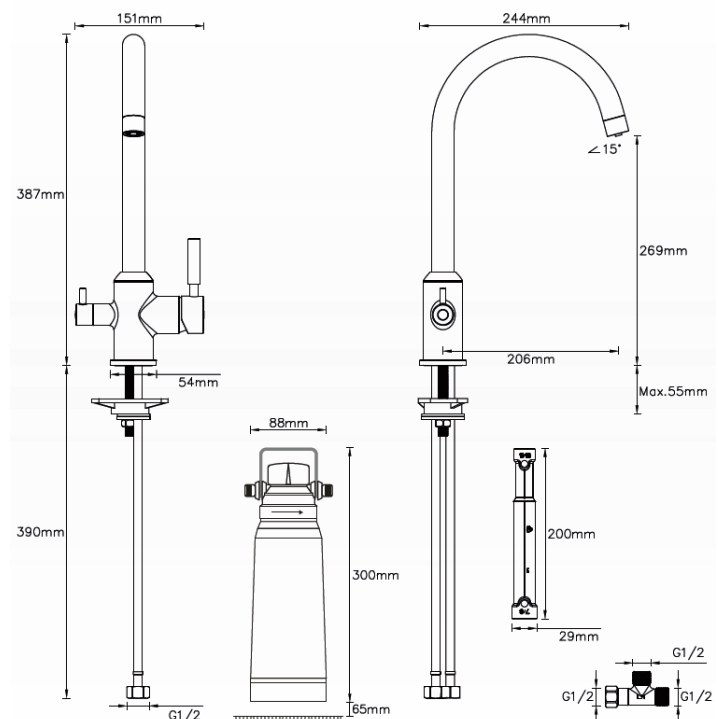

STYLISH

CONVENIENT

- Hot & cold mixer tap with separate filtered water lever
- Separate filter and head for flexibility of installation, easy cartridge changes and upgrades
- 5 stage filtration system
- Highly efficient limescale protection ideal for the protection of kettles and coffee makers
- Filter is suitable for vertical or horizontal installation making it adaptable and space saving
- Automatic water shut off valve minimises fuss during cartridge changes
- Installation kit supplied including tap fitting tool
- Note: Min operating pressure 2 Bar. Replace cartridge every 3 – 6 months depending on water quality & hardness

**System Part No.** BWTDWFK-TRIFLO  
**Replacement Cartridge Part No.** PREMCART

## Magnesium Mineralized Filter Upgrade

Magnesium ensures a perfect taste and is a flavour carrier!

With BWT your tap water becomes a real taste experience. Thanks to the patented technology magnesium is released into the water during the filtration process. By adding magnesium to the water, the mineral balance is maintained. The result is an almost neutral pH-value that connoisseurs of high-quality still mineral waters experience as especially tasty and soft.

Perfect for tea, coffee and the daily drinking pleasure!
