

NEPTUNE

ROBOTIC POOL CLEANERS

**LIGHTER THAN EXPECTED.
STRONGER THAN IMAGINED.**

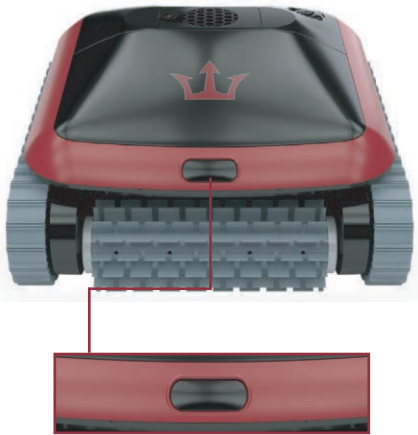

The New Neptune Line of Pool Cleaning Robots

Gen Core 7 navigation system.

The Neptune moves smoothly and efficiently, giving you complete peace of mind.

Neptune i10

Planetary gear technology

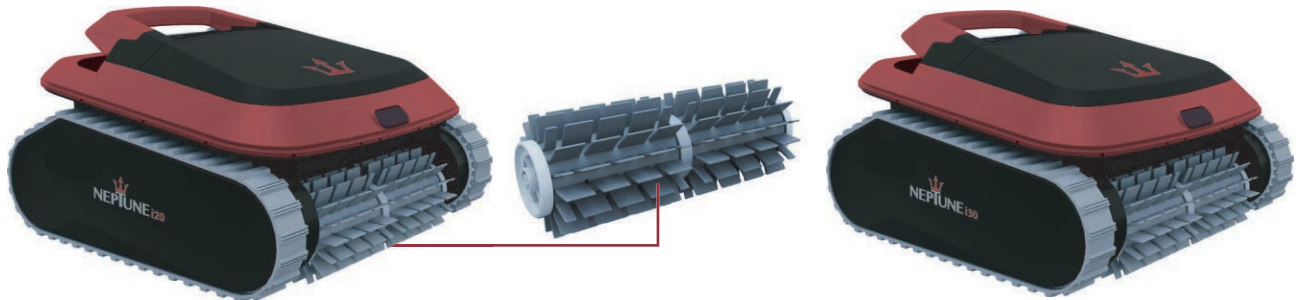

Neptune i10 robots are equipped with two-stage planetary gear technology, a drive system that offers greater efficiency and better precision. Combined with two drive motors and a powerful pump, **Neptune i10** is one of the most reliable robotic cleaners on the market.

This system is the ideal solution for fast, optimized travel, unmatched cleaning, and unrivaled reliability.

Energy efficient

With their rapid and logical travel mode and powerful suction, **Neptune i10** robotic cleaners work fast. Cleaning cycles are short, consume less energy, and yield a flawless result.

Neptune i20 & i30

Concentrated technology with low energy consumption

The **Neptune i20 & i30** pool cleaning robots clean the bottom, walls and waterline of any pool up to **46 ft** long for **i20** and **60 ft** long for **i30**.

Their smart navigation system and integrated gyroscope assure a sparkling clean swimming pool.

User-Friendly Design

Weighing in at **only 12.5 lbs** and equipped with a **rapid water evacuation** system, the Neptune is super easy to put in and take out of your pool. Cleaning the filter is also a breeze: simply lift it out from the top of the robot and hose off.

Powerful Suction

The **Neptune i10, i20 and i30** pool cleaning robots are equipped with **advanced vacuum technology capable of vacuuming up to 4,000 GPH**.

This effortlessly lifts and captures pool debris.

Increased Agility = More Efficient Cleaning

Designed with remarkable agility, they can turn on a dime like a tank. This precise maneuverability avoids scattering debris, enabling the robot to effectively capture everything in its path!

Neptune i40

Our Most Powerful Suction

The **Neptune i40** pool cleaning robot boasts superior suction power. Equipped with **our most advanced vacuum technology capable of vacuuming up to 5,300 GPH**, it effortlessly lifts and captures debris of all sizes.

Our Most Precise Filtration: HyperFine 4D

The advanced dual HyperFine 4D filtration system is designed to handle a wide range of debris. It captures particles **as large as 180 microns**, such as leaves and sand, but also superfine contaminants **as small as 1 micron**.

Removable filters make cleaning them a breeze! Simply lift them out of the robot and rinse off.

Neptune Nomad

Completely autonomous and rechargeable, it efficiently cleans the bottom, walls, and waterline of your pool up to 49 feet long, regardless of its shape or finish.

Smart navigation

The Nomad adapts its driving pattern to your pool shape thanks to its integrated gyroscope and ultrasonic sensor. It can also rotate on itself to avoid scattering debris!

Powered by **three motors**, this reliable cleaning companion is durable and lightweight. It has a 1-gallon filter basket with a **180-micron mesh**, ensuring effective debris removal.

SmartPark Retrieval System

Benefit from hassle-free robot retrieval with the SmartPark function. Thanks to an ultrasonic sensor, the Nomad parks itself by a pool wall at the end of each cleaning cycle. With the included hook, you can easily lift the robot out of the water.

Remote control and software updates

The Nomad is operated by the BWT Home mobile app, allowing you to select its cleaning cycles and modes. The app will also notify you of the robot's progress and indicate when the cycle is finished.

Effective brushes and powerful suction

The PVC and rubber brush combined with its impressive 4,000 GPH suction power ensure in-depth cleaning, removing algae, debris, and other impurities. The full filter indicator will warn you when it's time to clean it: simply remove the high tech filter from the top and rinse off.
